[Methodologies of Ambulatory Assessment Workshop](#)

Tuesday, May 11th

10am-3pm CST

Panel: Studying Aging in Minoritized Populations: The Value of Lived Experiences, From Community to Biomarkers

Event details TBA

NIA ANNOUNCEMENTS

[Announcements from NIA's Division of Behavioral and Social Research: January 2021](#)

[2021 Telomere Network Analysis Awards](#)- deadline extended to **APRIL 15th!**

The Telomere Research Network, sponsored by the National Institute of Environmental Health Sciences and National Institute on Aging, is developing a growing collaborative community of interdisciplinary scientists for promoting the science on telomere length as a predictor of health and aging, as described in detail on our website, trn.tulane.edu. We are seeking proposals from early-stage investigators who are interested in joining our network. We will support at least 5 projects in 2021 that address scientific gaps in the literature. Examples include telomere length in relation to exposures (including COVID), during pregnancy or early life, or longitudinally.

For funding opportunities through other P30 Centers on the Demography & Economics of Aging, see prior announcements [HERE](#).
