

## Naloxone Formulations

Order details for currently available naloxone formulations are listed below. Dispensing two doses is generally recommended in case the first dose is insufficient. Prescriptions should be issued to the recipient, even if the recipient is not the individual at risk for opioid overdose.

### Intranasal

#### Prefilled Syringe

1. Naloxone Prefilled Syringe (2mg/2mL), #2 boxes, PRN refills
  - Instill 1mL into each nostril as needed for suspected opioid overdose, repeat in 2 minutes if necessary
2. Mucosal Atomization Device with Luer-lock, #2 devices, PRN refills
  - Attach to prefilled naloxone syringe as needed for suspected opioid overdose

#### Nasal Spray

1. Narcan Nasal Spray (4mg/0.1mL), #1 two-pack, PRN refills
  - Instill 4mg into nostril as needed for suspected opioid overdose, repeat in 2 minutes if necessary

### Intramuscular

#### Vial & Syringe

1. Naloxone Vial (0.4mg/mL), #2 vials, PRN refills
  - Inject 1mL into outer thigh as needed for suspected opioid overdose, repeat in 2 minutes if necessary
2. IM Needle & Syringe (3mL, 25g, 1"), #2 syringes, PRN refills
  - Use to administer naloxone as needed for suspected opioid overdose

#### Auto-Injector

1. Evzio Auto-Injector (2mg/0.4mL), #1 two-pack, PRN refills
  - Inject into outer thigh as needed for suspected opioid overdose, repeat in 2 minutes if necessary
