In order to receive 1.00 contact hours of CE credit, the participant must be in attendance during the live program, participate in all parts of the presentation, and complete the online post-test, and complete the online evaluation within 60 days after the activity.

Faculty
Lucas G. Hill, Pharm.D.
Clinical Assistant Professor
College of Pharmacy
The University of Texas at Austin

Lucas Hill earned his Doctor of Pharmacy degree from the University of Missouri–Kansas City before completing a two-year primary care residency and faculty development fellowship at the University of Pittsburgh. Dr. Hill is now a clinical assistant professor at the University of Texas at Austin College of Pharmacy. He provides patient care and precepts learners at the CommUnityCare Southeast Health & Wellness Center. While he spends most of his time helping patients manage chronic diseases like diabetes, Dr. Hill is also passionate about the integration of behavioral health and addiction treatment in primary care.

He is Director of Operation Naloxone, a program that provides overdose prevention training and resources to students, health professionals, and the public. He also co-coordinates the Foundations for Interprofessional Collaborative Practice course established by UT Pharmacy, Nursing, Social Work, and Medicine. Dr. Hill is Faculty Advisor of the Student Pharmacist Recovery Network, Social Media Editor for iForumRx, and an affiliate of the Center for Health Communication.

Operation Naloxone
Operation Naloxone is an interprofessional collaboration from faculty and students at The University of Texas at Austin College of Pharmacy, School of Social Work, and Texas Overdose Naloxone Initiative. We provide overdose prevention and response education to students, health professionals, and the public to combat the opioid epidemic.
