

UTC Project Information – Cooperative Mobility for Competitive Megaregions (CM²)

Project Title	The Northeast Megaregion Travel Demand and Investment Model: Final Report and User's Manual
University	University of Pennsylvania
Principal Investigator	John Landis
PI Contact Information	jlan@design.upenn.edu
Funding Source(s) and Amounts Provided (by each agency or organization)	U.S. Department of Transportation: \$24,202 University of Pennsylvania: \$21,011
Total Project Cost	\$45,213
Agency ID or Contract Number	UTDOT Grant number: 69A3551747135
Start and End Dates	8/1/2018 – 8/31/2021
Brief Description of Research Project	This proposal outlines a series of second-year research activities in the development of the Northeast Megaregion Multi-modal Transportation Planning and Investment Model, a TransCAD-based set of analytical procedures for comparing alternative transportation investments across and between modes; and for exploring how those investments are likely to influence subsequent development patterns and economic activity levels. These procedures are being developed using the Northeast Megaregion as a testbed. The Northeast Megaregion extends continuously from southern Maine to Central Virginia along the I-95 corridor and includes 13 states, more than 50 million residents, and more than a dozen separate Metropolitan Planning Organizations (MPOs).
Describe Implementation of Research Outcomes (or why not implemented)	N/A
Impacts/Benefits of Implementation (actual, not anticipated)	N/A
