

Texas Child Psychiatry Access Network (CPAN)

Pediatric health clinicians' free and trusted mental health resource team.

CPAN can help you when you need support with patient mental health care and save you time in the process. Pediatric clinicians have real-time access to a multidisciplinary network of mental health experts, including child psychiatry, to get:

- >> Local, vetted resources and referrals within one business day specific to your patient
- >> Peer-to-peer, real-time consultations within 30 minutes or at a convenient call-back time
- >> Free behavioral health CMEs

Why CPAN?

- >> Children are more likely to see a pediatrician or family care provider when experiencing behavioral health challenges
- >> There is a shortage of child psychiatrists in Texas, and children often wait months for care
- >> CPAN is state-funded, and there is no cost to the provider to utilize the service
- >> With our help, you can feel more confident treating your patients' mental illness

How does CPAN help?

- >> Call us and get the support and expertise you need to treat your patients within their primary care setting
- Save time by delegating CPAN staff to provide you with vetted lists of local referrals and resources specific to your patient
- >> Your time consulting with CPAN may be billable via time or complexity-based coding

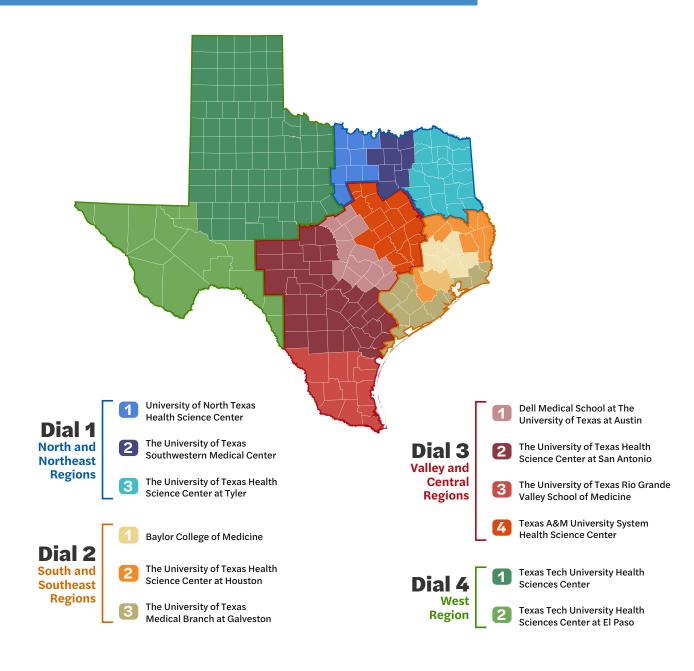

How does CPAN work?

- >> It's simple to enroll in and easy to use. Call **1-888-901-CPAN (2726)** to enroll and get help with a patient quickly
- >> CPAN staff are available on the phones Monday-Friday, 8 a.m.-5 p.m.
- >> You can leave a message anytime
- >> No call is too small. We are here to support you

CPAN is an incredible partner. As a pediatrician, knowing that I have a strong referral base and quick access to peer consultation is invaluable.

Angela Moemeka MD MBA Pediatrician
