

UKRAINIAN INSTITUTE OF STRATEGIES OF GLOBAL DEVELOPMENT AND ADAPTATIONS

invites you to take part in preparing a collection of scientific works

"THE CONFLICT IN EASTERN UKRAINE IN CONTEXT OF GLOBAL TRANSFORMATIONS"

The collection has a goal to collect articles (first of all philosophical) which are directed to comprehension of causes of crisis situation, the result of which was an armed conflict in the Donbass region. With all the diversity and frequently the contrast of estimations the essence of conflict and its genesis, today the judgements, categoricalness of which points at their ideological political bias, are heard too often.

Among the initiators of the collection – people, who know about the war in Donbass region not by chance, for whom the necessity of puzzling out the events can be classified as existential goals. However, not only for individuals, but for Ukraine, Russia and Europe in general the military catastrophe 2014 became a call, the answer to which is still not clear enough.

This collection of works is called to become one of the steps on the way of comprehension of the events, which will bring the members of this conflict closer to the answer to the question: "What must happen in our world, Europe and Ukraine for the humanity of the 21-st century faced a threat of the new global war?"

Articles are accepted until 9-th of February, 2015.

Works, which were not published earlier on the given topic, are accepted for publishing in the collection of scientific works **"The conflict in Eastern Ukraine in context of global transformations"**.

Document must be written in an electronic form **in format .doc, must be written in Russian, Ukrainian, English or in German language, can't exceed 20.000 characters, font – Times new roman.**
