

Introduction to SBIRT Demonstration Videos
Transcript

1

00:00:11,470 --> 00:00:16,510

This series of videos is designed to demonstrate the use of SBIRT in a hospital setting.

2

00:00:16,950 --> 00:00:26,030

SBIRT is an evidence-based intervention technique that can be used when encountering patients who present with indications of potentially high-risk substance use.

3

00:00:26,640 --> 00:00:38,080

These videos feature real-life physicians, social workers, and licensed counselors in a hospital setting, using the SBIRT interviewing methodology to identify and change those risky behaviors.

This video was made with support from the Texas Health and Human Services Commission through federal funding from the Substance Abuse and Mental Health Services Administration grant award number [HHS001196700002](#).
