

Teacher Advisor with Watson

Your destination for improving your planning and instruction

Teacher Advisor with Watson is a free online tool that will provide teachers with resources to improve planning and instruction.

Find and customize high quality, vetted lessons and activities that are aligned to academic standards

Strengthen instructional expertise through a diverse and growing corpus of videos and supporting resources

Receive guidance and support from Watson, a cognitive computing assistant to help navigate to targeted resources.

Are you a 3rd grade math teacher looking to improve your practice?

By being one of the first users of Teacher Advisor, you will have the opportunity to help shape this powerful resource for teachers, while gaining a new resource to help you streamline your planning process.
