

CODE@TACC

SUMMER HIGH SCHOOL STEM CAMP

WEARABLES

June 25-29, 2018

Learn about electronics

Learn Internet of Things (IoT) development

Create wearable devices and design an interface

CODE @ TACC Wearables is an innovative and exciting summer program that incorporates a project-based learning approach to expose students to Science, Technology, Engineering, and Math (STEM) innovation. Students will foster their talent and creativity by being introduced to the principles of high performance computing, life sciences, electronics and IoT.

All current 9th through 12th grade high school students are welcome to register.

For more information, contact:

K12@tacc.utexas.edu | 512-232-0831

COST

Non-refundable registration cost of \$989.00. Cost includes lunch, materials and field trip travel to and from local tech company. Travel to and from TACC each day is not included in cost. Also, participants will need to bring a computer.

Need based scholarships are available.
